## Objective

I'm a passionate and driven Computer Science undergraduate with a strong foundation in both frontend and backend development. Currently freelancing as a frontend developer, I specialize in creating intuitive, responsive user interfaces using HTML, CSS, JavaScript, and React. My backend experience spans languages such as Java, C++, C, and Python—enabling me to work across the full stack as I continue expanding my skill set toward becoming a well-rounded full stack developer. I've proudly represented my college in several nationwide hackathons, where I honed my problem-solving and teamwork skills under pressure. Alongside my technical pursuits, I'm actively exploring the exciting domains of Machine Learning, Data Science, and Generative AI, with a keen interest in how artificial intelligence can revolutionize medical science.

## Education

### Bachelor of Technology in Computer Science & Engineering

Vellore Institute of Technology, Bhopal, Madhya Pradesh

2023 – 2027 (Expected)

- Current CGPA: 8.72/10
- Relevant Courses: Data Structures, Algorithms, DBMS, OOPs, Operating Systems, Computer Networks, HTML, CSS, JavaScript, React, Node.js, Docker.

### Class 12 (CBSE)

Apeejay School, Pansheel Park, New Delhi

- Percentage/Grade: 92%

### Class 10 (CBSE)

Apeejay School, Pansheel Park, New Delhi

- Percentage/Grade: 93%

## Technical Skills

Languages: C, C++, Java, Python

Web Development: HTML, CSS, JavaScript, React.js, Node.js

Database: MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Linux

Other: Data Structures & Algorithms, OOP, REST APIs, Firebase

## Projects

### 1. Plant Disease Detection System using CNN

Python, TensorFlow, Keras, Convolutional Neural Networks (CNN), OpenCV

- Developed a deep learning model using CNN to identify and classify plant diseases from leaf images with high accuracy.
- Trained the model on a public dataset of infected and healthy plant leaves.
- Achieved over 97.6% accuracy on validation data.
- Implemented image preprocessing techniques like resizing, normalization, and augmentation to improve model performance.
- Deployed model via a simple GUI for user-friendly disease prediction.

### 2. Early Alzheimer's Detection Model

Python, Scikit-learn, TensorFlow, CNN, MRI Imaging Data

- Built a machine learning model to detect early stages of Alzheimer's disease using MRI scan images.
- Preprocessed volumetric MRI data to extract relevant brain features and normalize input for training.
- Applied Convolutional Neural Networks to classify images into Alzheimer's stages (e.g., Mild Cognitive Impairment vs. Normal).
- Achieved 98% accuracy on validation set using cross-validation techniques.
- Used open-source datasets like ADNI for model training and evaluation.
- Focused on early diagnosis to assist medical professionals in timely intervention.

### 3. Personal Portfolio Website

HTML, CSS, JavaScript

- Designed and developed a responsive personal portfolio website to showcase academic achievements, technical skills, and projects.

- Implemented a clean, modern UI/UX design with smooth scrolling, navigation, and section transitions.
- Integrated GitHub repositories and contact form for easy access to work and direct communication.
- Deployed the site using GitHub Pages for public access and version control.

## Certifications

- Bits and Bytes of Computer Networking – Coursera
- Introduction To Machine Learning -NPTEL
- Introduction to cloud computing 101 - AWS
- Getting Started with Security – AWS
- Getting Started with Storage- AWS
- Getting Started with Databases – AWS
- Web Development Bootcamp – Youtube

## Achievements & Extracurriculars

- Participated in John Hopkins's Hackathon.
- Member of Android Club of my college.
- Regular participant in LeetCode and HackerRank contests.

## Soft Skills

- Problem-solving
- Team collaboration
- Quick learner
- Communication skills

## Languages

- English (Fluent)
- Hindi (Native)
- French
