

PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate with hands-on experience in Machine Learning, Data Science, and AI application development. Skilled in Python, TensorFlow, Scikit-learn, SQL, and data analysis, with experience building end-to-end ML solutions for healthcare, computer vision, and fraud detection. Passionate about solving real-world problems through data-driven decision-making and continuously exploring emerging AI technologies.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, SQL
Web Technologies	Next.js, React, FastAPI, Tailwind CSS, Zustand, Celery
AI and Machine Learning	LangGraph, RAG, Multi-Agent LLMs, TensorFlow, Scikit-learn, NLP Embeddings
Database and DevOps	PostgreSQL (pgvector), Qdrant, Redis, Docker, AWS (EC2, S3, Lambda), Vercel
Soft Skills	Documentation Work, Rapport Building, Excellent Communication

PROJECTS

- **TrialBridge AI - Clinical Trial Matching Engine**

[REPO](#)

TypeScript, Next.js, Python, FastAPI, Qdrant (Vector DB), Tailwind CSS

January 2026

Developed an AI-powered clinical trial matching platform using Next.js and FastAPI, engineering secure dashboards for 2 distinct user roles to streamline clinical onboarding. Architected a reverse-matching engine utilizing Qdrant Vector Database and semantic NLP embeddings, processing over 5,000+ clinical records while reducing search latency to under 50ms. Built a real-time trial invitation system with a responsive Tailwind CSS interface, automating the evaluation of complex genomic profiles to achieve 90%+ matching precision and accelerating candidate pipeline generation by 80%.
- **LLM Gateway: Cost-Saving AI Proxy and Observability Platform**

[REPO](#)

Go, PostgreSQL (pgvector), Redis, Next.js, TypeScript, Tailwind CSS, Docker

March 2026

Architected a high-throughput AI gateway in Go to optimize Large Language Model (LLM) API costs and minimize response latency. Engineered a dual-layer caching architecture utilizing Redis for sub-2ms exact-match retrieval and PostgreSQL with pgvector for semantic similarity matching via cosine distance. Implemented robust token-bucket rate limiting via Lua scripts and automated failover routing to ensure high availability. Built a responsive Next.js observability dashboard to visualize real-time request traces, cache hit rates, and automated cost savings.
- **MedFlow AI - Agentic Healthcare Workflow Assistant**

[REPO](#)

FastAPI, Next.js, PostgreSQL (pgvector), LangGraph, Multi-Agent LLMs, RAG, Docker

August 2026

Architected a production-grade full-stack healthcare platform using FastAPI and Next.js, integrating an advanced multi-agent orchestration engine to autonomously analyze unstructured medical documents. Engineered a secure Retrieval-Augmented Generation (RAG) pipeline utilizing PostgreSQL with pgvector to enable patient-isolated semantic search and structured clinical entity extraction. Designed a strict Human-In-The-Loop (HITL) safety layer via asynchronous Celery task queues to detect critical medication discrepancies and health risks, ensuring high-fidelity data integrity and clinician oversight across a containerized microservices architecture.

WORK EXPERIENCE

- **Zetheta Algorithms Private Limited (Remote)**

Jul 2026 – Present

Stock Screener Dashboard — Full Stack Developer

Developed a production-style stock screener dashboard supporting 5,000+ simulated stocks with advanced search, filtering, sorting, pagination, and persistent watchlist management. Built an interactive analytics dashboard featuring portfolio insights, market overview, sector allocation, and dynamic stock detail visualizations using Recharts. Designed a responsive, component-driven architecture with Zustand for scalable state management and deployed the application on Vercel.
- EDUCATION
- Vellore Institute of Technology**, Bhopal, MP

Sept 2023 – Jan 2027

Bachelor of Technology – Computer Science & Engineering

GPA: 8.91

Apeejay School, Panchsheel Park, New Delhi, India

Senior School Certification Examination (Class 12 Boards)

Score: 92%

Apeejay School, Panchsheel Park, New Delhi, India

Secondary School Certification Examination (Class 10 Boards)

Score: 92.5%
- CERTIFICATIONS
- Oracle Certified Foundations Associate – Agentic AI**

Score: 92%

Demonstrated foundational knowledge of Agentic AI, AI agents, generative AI, and autonomous AI-driven workflows. Developed an understanding of agent architecture, reasoning, tool usage, and intelligent task automation for building next-generation AI applications.

AWS Certified Cloud Practitioner – AWS

Score: 90%

Demonstrated foundational knowledge of AWS Cloud services, architecture, security, pricing, and deployment models. Hands-on understanding of core services including EC2, S3, IAM, VPC, Lambda, RDS, CloudFront, and CloudWatch.
